

UC3 Dataset Download Instructions

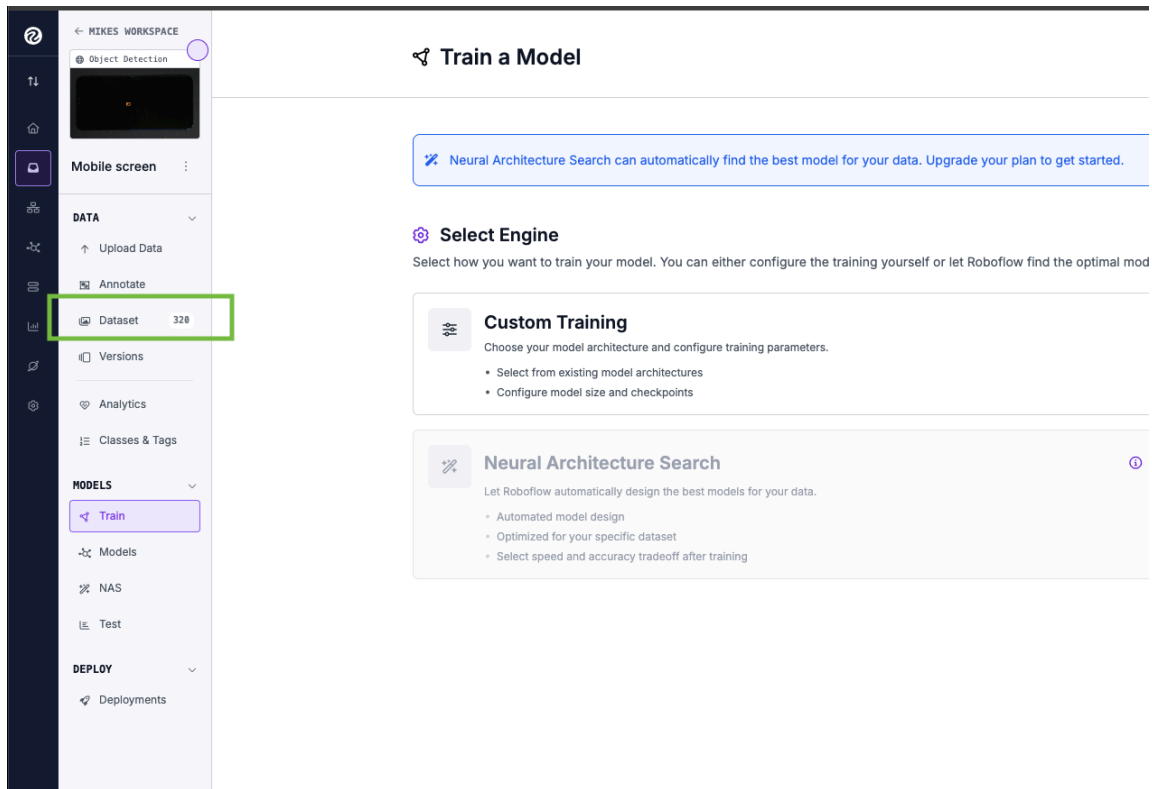

1. Go to the dataset roboflow page (you may need to register/sign in to your own account):
<https://universe.roboflow.com/vu-thi-thu-huyen/mobile-screen>
2. Click “Use this Dataset”, then click “Fork Dataset”:

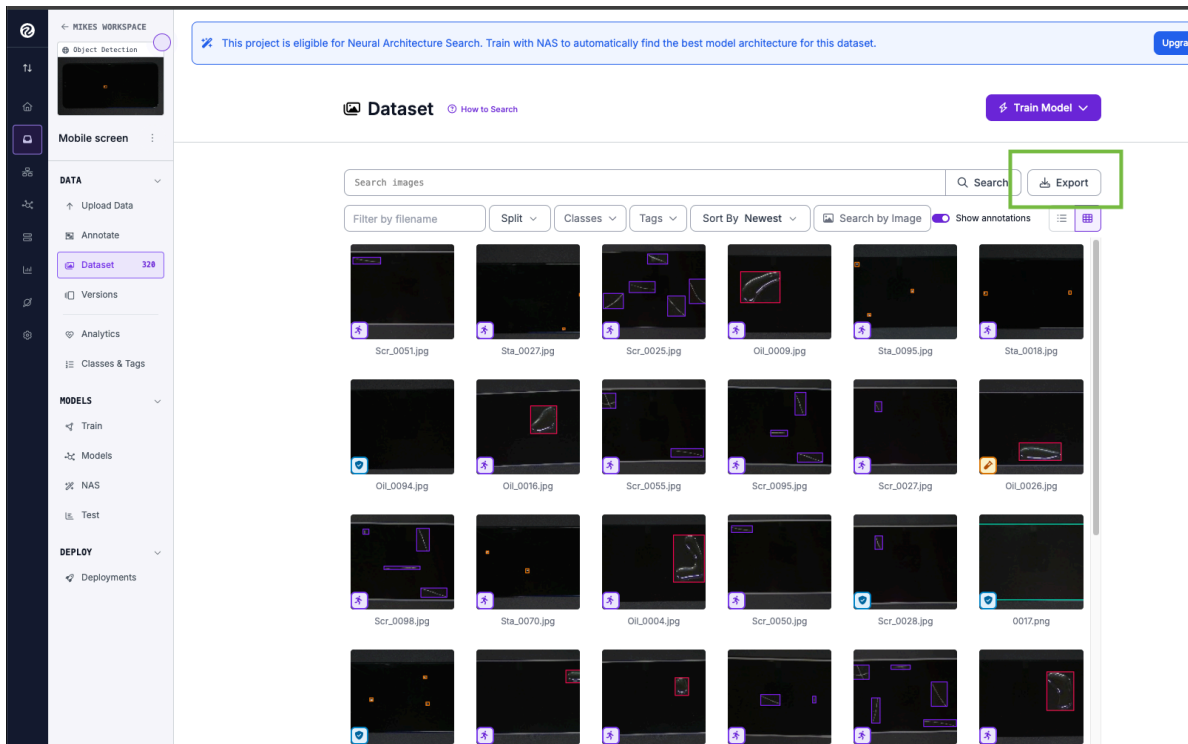

3. Click “Fork Dataset”, which will copy the files to your own Projects/Workspace:
Note: You may need to set up your Projects/Workspace page at the first time.

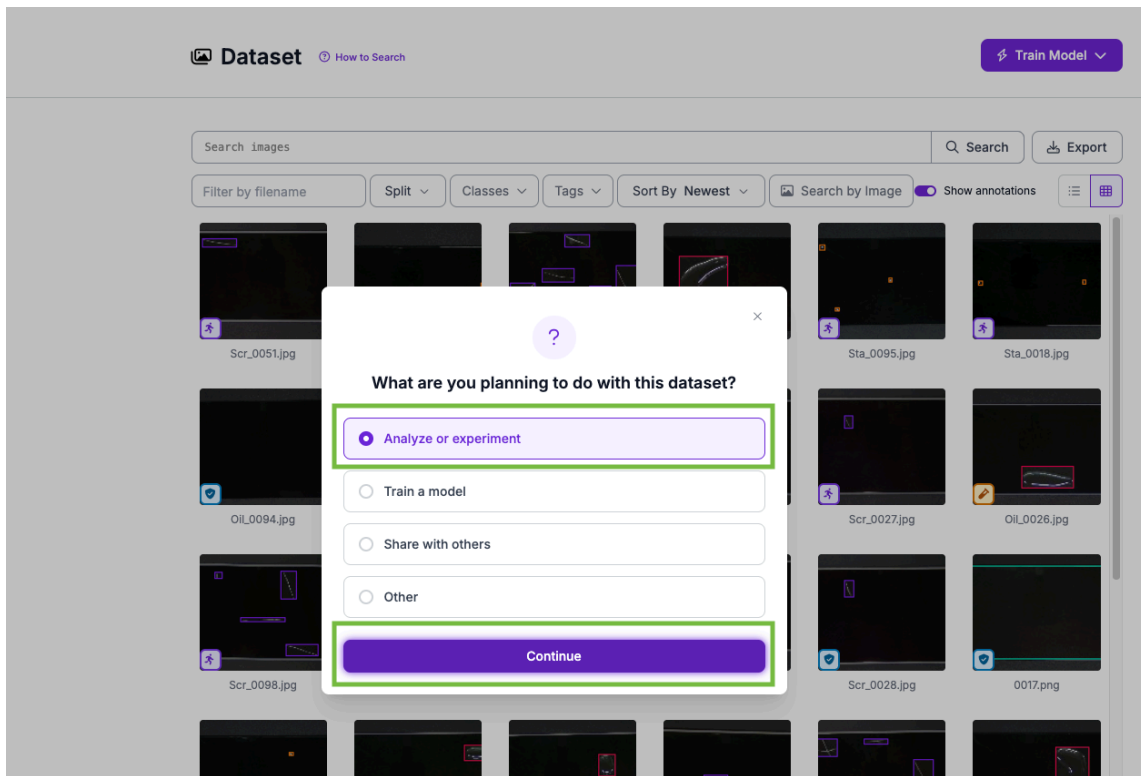

4. In your own Projects/Workspace, enter the “**Mobile screen**” page and select “**Dataset**” on the left bar:

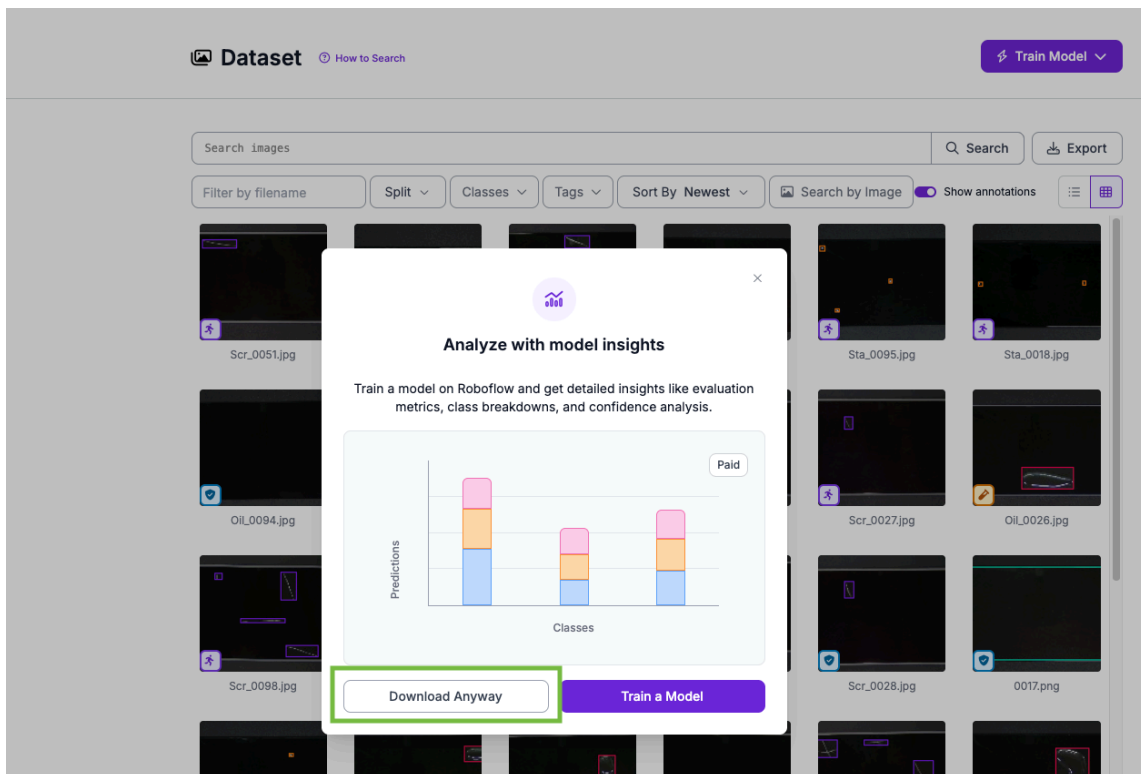

5. Click “**Export**” on the top-right corner of the page:

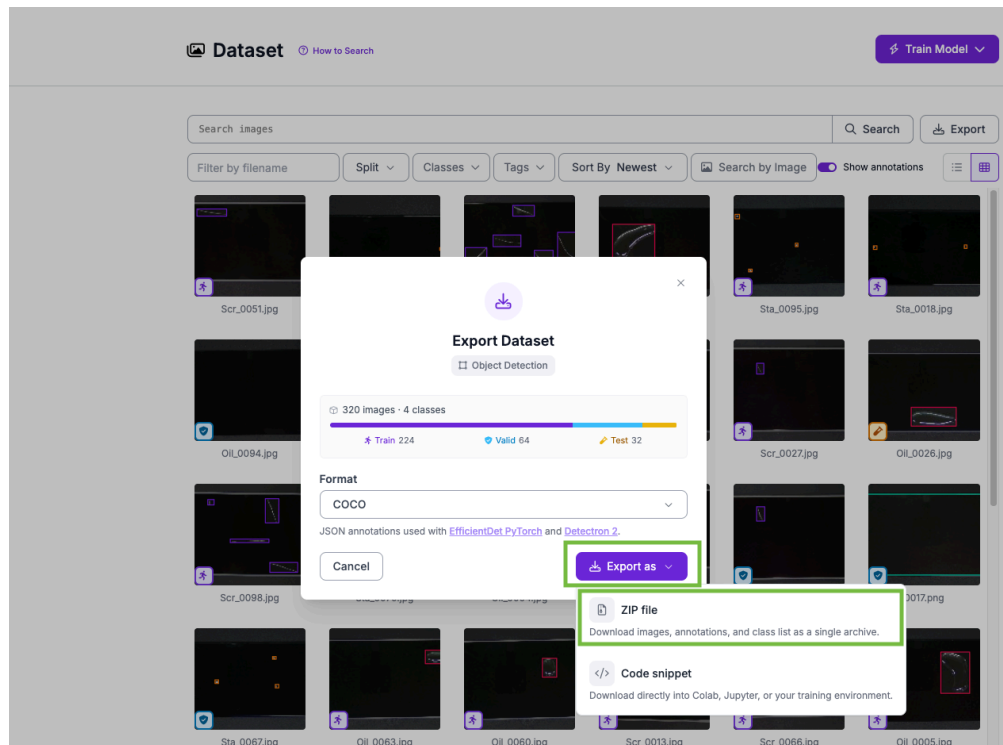

6. Choose “**Analyze or experiment**” and click “**Continue**”:

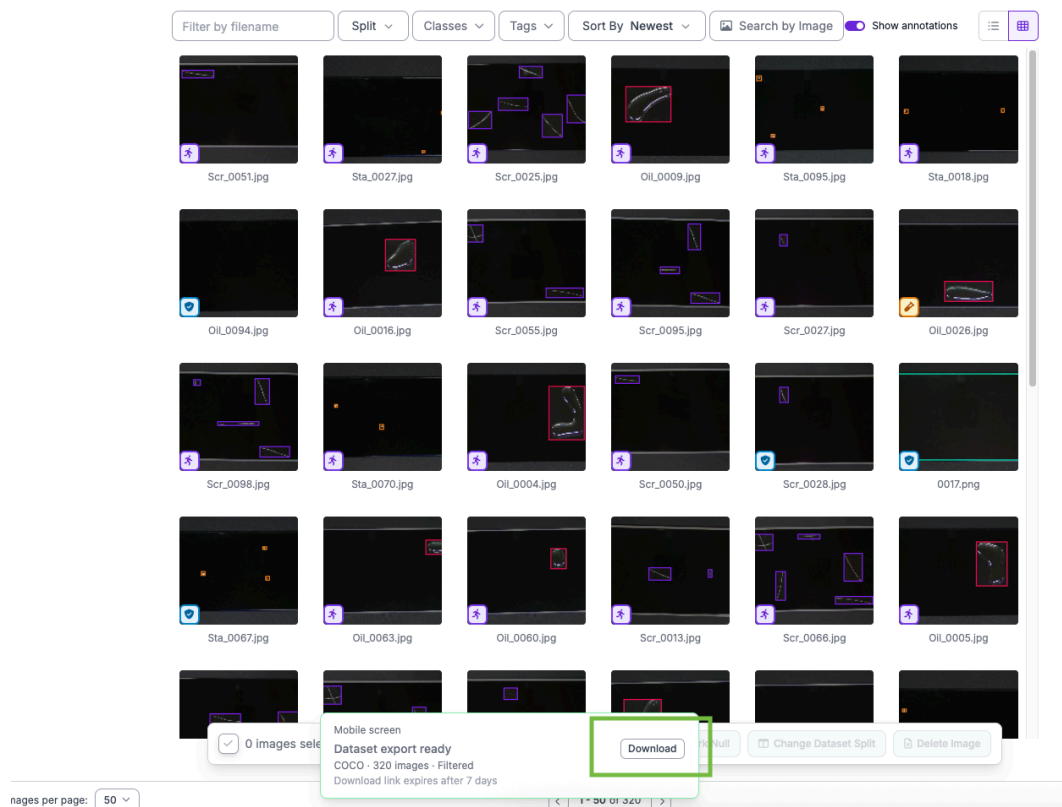

7. Click “**Download Anyway**”:

8. Click **“Export as”** and click **“ZIP file”**

9. After export ready, you should see a **“Download”** button at the page bottom. Click it and the zip file will be downloaded to your local machine:

After downloading, you should upload the zip file on your local machine to the server.

Then use `scripts.utilities.prepare_dataset_uc3.py` to extract the specific images into structured folders:

- **<output_dir>/Phone/anomaly_image/**
- **<output_dir>/Phone/clean_image/**

Shell

```
python3 -m scripts.utilities.prepare_dataset_uc3 <output_dir> \  
--zip <path/to/downloaded.zip>
```

Note that

- **<output_dir>/Phone/mask/**
- **<output_dir>/defect_spec.jsonl**

are from NGC.
